

ZPH Science Lunch

October 20, 2022 / 12:00 - 13:00

VIRTUAL EVENT (WEBEX)

Selma Kronsteiner-Gicevic, ScD, MSc

Postdoctoral Fellow

Department of Epidemiology

“Diet quality metrics and novel tools for capturing diet”

Diet is the #1 morbidity and premature mortality modifiable risk factor in both developed and developing countries; poor diets kill more people globally than tobacco and alcohol abuse together. Yet measuring diet, as a complex exposure, has been a challenge. Diet quality and dietary patterns gained attention in nutritional research due to their associations with cardiometabolic and other health outcomes. In this Science Lunch, Selma Kronsteiner-Gicevic will give an overview about diet quality metrics and tools, and will present some of her research about the topic.
